1.0	Group - Code Crafters	This user manual serves as a comprehensive guide for KnowYourCibo, providing step-by-step instructions, troubleshooting tips, and essential information for users to effectively utilize KnowYourCibo.	01/04/2024

1. PURPOSE

The purpose of this software is to enhance the overall dining experience within IIT Kanpur's campus. By providing a centralized platform for authentic and community-driven food reviews, the software aims to assist individuals in making informed decisions when exploring diverse culinary options. Additionally, the purpose extends to fostering a sense of community engagement and collaboration, where users actively contribute to building a valuable resource for others.

The platform provide the following benefits :-

- **Informed Decision-Making:** Users gain access to a wealth of authentic reviews, enabling them to make informed decisions when selecting food items or restaurants.
- **Community Building:** The platform fosters a sense of community engagement, allowing users to share their experiences and contribute to a collective repository of knowledge.
- **Enhanced User Experience:** Additional details such as opening hours, and location, coupled with visual content like food photos, contribute to a more enriched and enjoyable user experience.
- **Trustworthy Platform:** The authentication system, moderation features, and user reporting mechanisms ensure a trustworthy environment for dining recommendations, enhancing the reliability of the platform.

The major functions that the system must perform or enable the user to perform are:

1. Allow users to create accounts and log in to access personalized features like giving ratings and reviews, enhancing user engagement and data personalization.
2. Implement a robust search functionality enabling users to find restaurants or items efficiently within the system.
3. Display a comprehensive list of available restaurants, providing users with an overview of their options.
4. Offer a personalized profile page for users to manage and customize their information, preferences and favorite dishes.
5. Enable users to mark food items as favorites, facilitating quick access.
6. Allow users to rate and review food items, fostering a sense of community and aiding others in decision-making.
7. A dedicated page with contact information of service providers, promoting communication and customer support.
8. Include a user-friendly feedback page where users can share their thoughts on the system, user experience, or any other comments, contributing to continuous improvement and customer satisfaction.

2. AUDIENCE

The software platform caters to a diverse audience within the vibrant community of IIT Kanpur, encompassing:

Students: Both undergraduate and graduate students, eager to explore and experience the rich culinary offerings available on campus. Whether they seek quick bites between classes or leisurely dining experiences, students form a significant portion of the platform's user base.

Faculty and Staff: Members of the academic and administrative staff who require convenient dining options to fit their busy schedules. The platform serves as a valuable resource for faculty and staff members looking for a variety of dining choices, from quick lunches to relaxed dinners.

Visitors: Guests and visitors to the IIT Kanpur campus, including parents, alumni, and invited speakers, who wish to discover and indulge in the local food scene. The platform offers insights into campus dining options, helping visitors make the most of their time on campus.

Food Enthusiasts: Individuals with a passion for food who appreciate authentic reviews and recommendations for dining experiences. Whether they are connoisseurs seeking culinary excellence or simply curious about trying new dishes, food enthusiasts find value in the platform's community-driven reviews and ratings.

Community Members: Those interested in actively participating in building a comprehensive repository of dining information for the benefit of the campus community. Community members contribute to the platform by sharing their dining experiences, thereby enriching the collective knowledge base and fostering a sense of camaraderie among users.

Service Providers: Restaurants and food vendors operating within the campus, eager to engage with the student and faculty population and showcase their offerings. The platform serves as a channel for service providers to connect with potential customers, share updates about menu offerings and promotions, and gather feedback to enhance their services.

By catering to the needs and preferences of this diverse audience, the software platform aims to serve as an indispensable tool for enhancing dining experiences, facilitating informed choices, and fostering a thriving culinary culture within the IIT Kanpur community.
